

## Experiment -11

Create a virtual hard disk and allocate the storage using vmware workstation

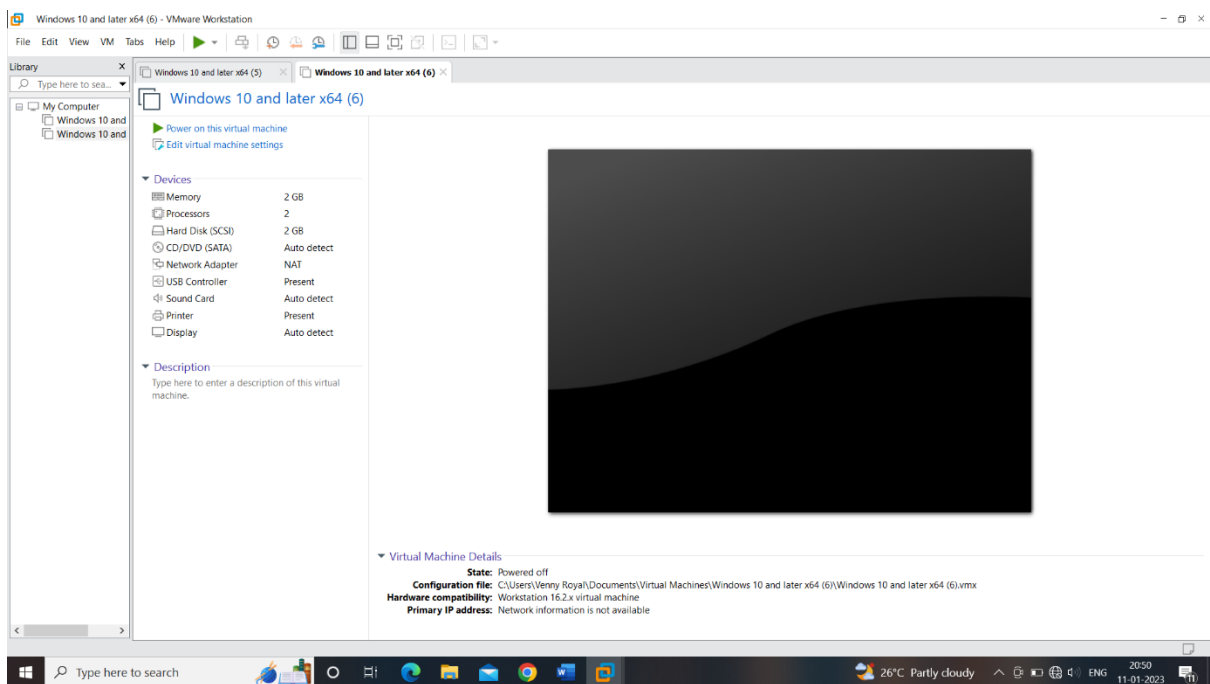

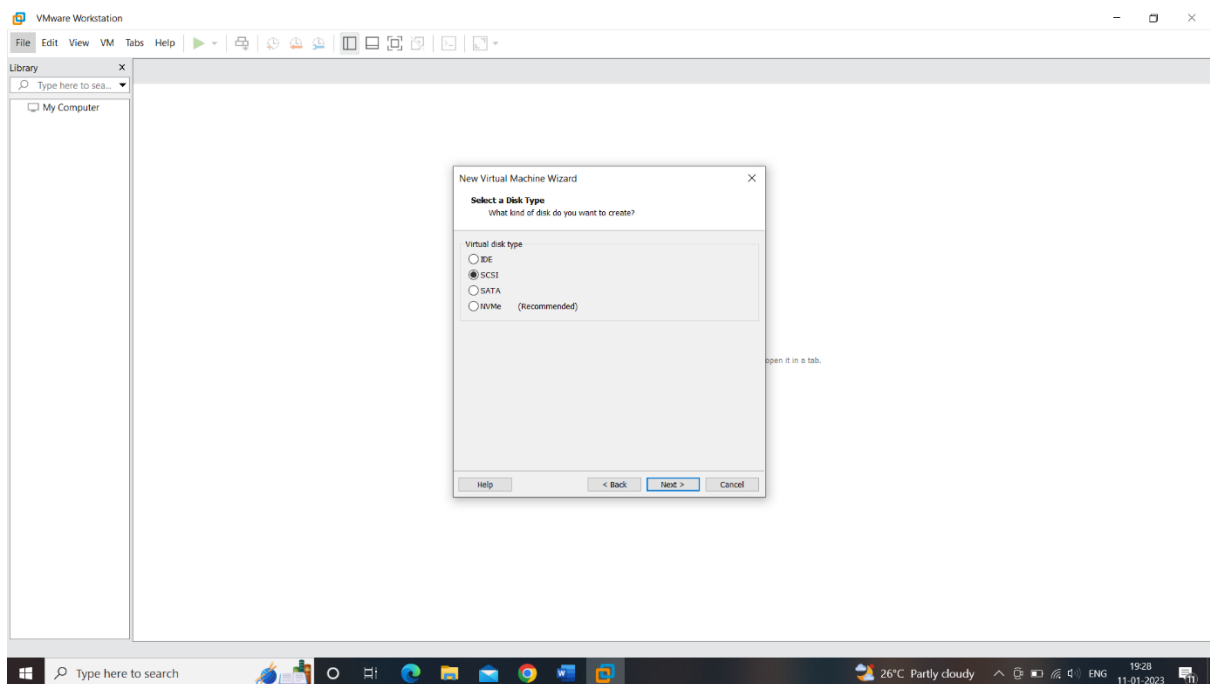

Aim:- To create a virtual horddisk and allocate the storage using vmware workstation.

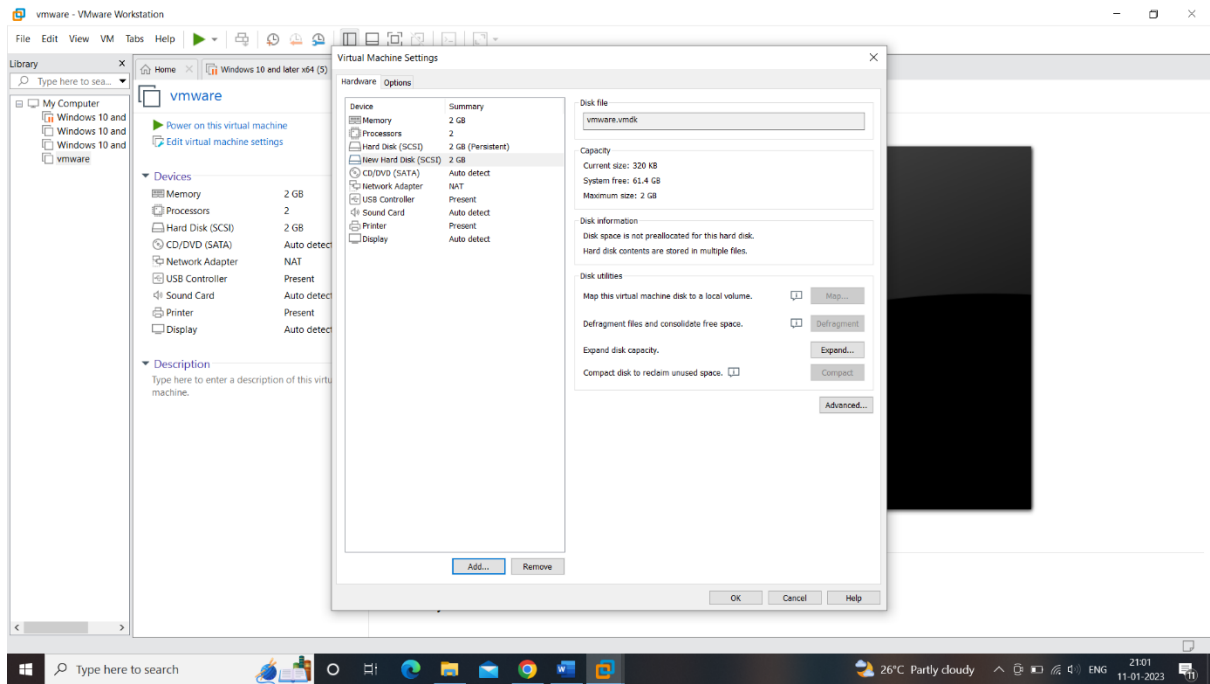

procedure:-

- ① Install vmware workstation.
- ② open any file
- ③ click on vm & go to settings.
- ④ select add option after clicking hard disk
- ⑤ Add Hardware wizard click on next option
- ⑥ select scsi virtual disk type & click on next option
- ⑦ specify disk capacity of split virtual disk into multiple files
- ⑧ one 2GB disk file will be created and click on finish button
- ⑨ Then we can see the new harddisk scsi can be created.

Result:-

Creation of virtual machine horddisk and allocating storage using vm workstation is successfully created.
