

## EXPERIMENT 2. CREATING CLOUD SOFTWARE APPLICATION

### Experiment - 2

- ② Create a simple cloud software application and provide it as a service using any cloud service provider to demonstrate software as a service

Aim:- Creating a simple cloud software application and providing it as a service

Procedure:-

- ① Goto Zoho.com
- ② Login to the Zoho.com
- ③ Select one Application
- ④ Enter Application name
- ⑤ Created new application
- ⑥ Select one form
- ⑦ The software has been created

Results:- cloud software application has been created, it provides as a service using cloud service provider to demonstrate software as a service

The screenshot displays the Zoho Creator interface for customizing a 'Room Booking' form. The top navigation bar includes 'Design', 'Workflow', and 'Settings' tabs. The main workspace is divided into four panels: 'Forms' (with 'Room Booking' selected), 'Reports' (with 'Booking Details' and 'Bookings View'), 'Workflows' (with various 'Run Scripts' actions), and 'Pages' (showing 'No pages to display'). A right sidebar titled 'Form Customization - Web' shows 'Label placement' options. The bottom status bar indicates 'Trial expires in 15 days' and 'Upgrade' options.
