EXPERIMENT 1. CREATE VIRTUAL MACHINE

9/1/23

Experiment - 1

① Create a Virtual machine

Aim:- Create Virtual machine by installing oracle Virtual box - windows.

Procedure:-

① Install oracle Virtual box windows installer

② To create virtual machine click machine from oracle VM Virtual box manager.

③ Then click New

Give a specific Name to VM and if neccessary Iso image also (optional)

④ To create vm we have to set hardware

-we can modify vm's hardware by changing amount of RAM and virtual cpu count

⑤ Next to add Virtual hard disk if we want we can add or we can also create vm without Virtual hard disk

⑥ Now you get Summary of Virtual machine

* machine Name & OS Type

* It's Hardware

* Disk

Now click finish

Results:-

Virtual machine is created.

It gives General System, display, storage,
audio, Network, USB, shared-folder and description
information.
