Experiment -7

④ Create a snapshot and cloning of a virtual machine and test it by loading the process Previous version / cloned vm

Aim :- Creating a snapshot and cloning of a virtual machine and test it by loading the Previous version / cloned vm

Procedure :-

① Install the oracle virtual machine Box

② click machine from oracle vm virtual box manager

③ Select clone in the machine options.

④ opened clone virtual machine and asked to choose a name and optionally a folder for the new vm. The new machine will be a clone of the machine name

⑤ on click next it gives the option to choose the type of clone we wish to create

* Full clone
* Linked clone

choose Full clone and click finish it gives an exact copy of the original vm will be created

Result :- Created a snapshot and cloning of a virtual machine.
