⑩ Create a cloning of a VM and test it by loading
the previous versions or cloned vm!

Aim :- Create a cloning of a vm and test it by
loading the previous versions / cloned vm

Procedures :-

① Install the oracle vm virtual box

② click machine from oracle VM virtual box management

③ Select clone in the machine tool

④ open clone VM and asked to choose a name and
optionally a folder for the new vm . The
new machine will be a clone of the machine
name

⑤ click next it gives the option to choose the type
of clone we wish to create

   * full clone
   * Linked clone

   Select full clone and do finish.

Result :- Hence, a cloning of a VM and test
  . it by loading the previous versions /
   cloned vm
